

CS214-Algorithm and Complexity

Project Demo Description

Requirements of Demo:

- You need to introduce your **report**, run your **code**, and exhibit your **results** to TAs (PPT is not required) during 10 mins. Please make sure to clearly explain your algorithm design, data cleaning and selection methodology, and numerical experiments. The most important judgement is whether this project is finished by your own.
- All three team members should come together for this presentation. If in case someone has time confliction, please report to TA earlier or contact other teams to swap (also need to report to TA). As least one member should demo your project to TAs, otherwise your team will lose the points for explanation.
- Due to the uncontrollable factors in the demo process, please be ready at least 20 minutes in advance, and you are free to go after demo slot.

Zoom Meeting Room Statements:

- **Algorithm Project Demo Room (1):** Meeting ID: 94684996806, Password: 143949.
- **Algorithm Project Demo Room (2):** Meeting ID: 93535625521, Password: 676655.

Time Schedule: **June 20, 2020**
